

Wall Street and Washington Have Their “Bailout” Plans ... and We Have Ours!

- 1** The seizure and takeover of all banking and financial institutions, their placement into common ownership under the direct control of workplace committees in conjunction with working people’s account-holding commissions.
- 2** Opening of the books of all financial and banking institutions, and of all corporations demanding “bailout” by the government, for examination and reorganization by the working people’s account-holding commissions.
- 3** The takeover, re-tooling and re-opening of all production facilities closed down in the last 10 years, their placement into common ownership under the direct control of workplace committees and working people’s economic commissions.
- 4** The organization of “public works” programs under the control of workplace committees, in consultation with locally-elected Reconstruction Commissions, to rebuild infrastructure, public facilities and residential neighborhoods.
- 5** Nullification of all mortgage, student loan, health care, home utility (electricity, natural gas, water) and credit card debt. Prohibition of the use of credit reports and non-criminal background checks as a condition of employment.
- 6** A minimum weekly wage of \$800, adjusted to the cost of living and tied to the rate of inflation. Unemployment benefits raised to this minimum wage, provided for as long as someone is unemployed.
- 7** Mandatory price freezes and rollback to year 2000 levels on all goods and services, and on rent prices. A sliding scale of wages and hours to aid in the elimination of unemployment and poverty.
- 8** Abolition of the payroll tax and all “sin taxes” on articles of consumption. Abolition of income taxes for families who earn less than \$62,400, and for individuals who earn less than \$41,600, annually. Restoration of pre-1964 tax structure for higher incomes.

**No Bribes for Bosses or Managers!
For a Working People’s Republic!**
